

mama maria kenya
Health Care & Community Development

One-and-a-half year-old Junior came into the Mama Maria Clinic with malaria ... as do the majority of children treated at the clinic.

Malaria, the number one killer of children under the age of five in Africa, is responsible for the deaths of one in five children. There are approximately 34,000 malaria deaths each year in Kenya alone.

Because of the treatment given at Mama Maria, thankfully, Junior is still with us, and malaria statistics have received a serious blow in the Nyanza Province of Southwestern Kenya.
